OBJECTIVE

Aspiring software engineer with a strong foundation in AI and ML, committed to developing innovative, data-driven solutions to solve real-world challenges. Passionate about leveraging technology for impactful applications.

EDUCATION

B.Tech in Mathematics and Computing

Rajiv Gandhi Institute of Petroleum Technology (RGIPT)

2024-2028

SKILLS

Technical Skills	Python, C++, Java, SQL, OpenCV, TensorFlow, PyTorch, NumPy, Pandas
Web Development	HTML, CSS, JavaScript, ReactJS, Firebase
Soft Skills	Problem Solving, Leadership, Teamwork, Communication
Database	MySQL, PostgreSQL, Firebase

EXPERIENCE

Software Programmer Intern

Google Developers Group

Feb 2025 - Present

India, Hybrid

- Developed and optimized machine learning models for scalable AI solutions.
- Contributed to open-source projects and community-driven AI tools.

Financial Trader

Groww

Feb 2022 - Present

Remote, India

- Applied algorithmic trading strategies to enhance portfolio performance.
- Conducted in-depth market research for investment decisions.

PROJECTS

AI-Powered Virtual Keyboard Using Hand Gestures Built an OpenCV-based real-time virtual keyboard for hands-free interaction.

Real-Time Object Detection Developed an object detection system using YOLOv5 with high accuracy.

Handwritten Digit Recognition Implemented a CNN-based model achieving 98% accuracy on MNIST dataset.

EXTRA-CURRICULAR ACTIVITIES

- Team Volzo was recognized among the **Top 500 Startups at Innopreneurs Season 11**, a global startup contest held across 14+ countries and organized by Lemon Ideas.
- Contributed to **Open Source AI** initiatives and hackathons.

LEADERSHIP

- Campus Ambassador at Urjotsav 2K24, leading tech and outreach initiatives.
- Technical Lead in college projects, mentoring students in AI and ML applications.
